

Professional practice of students of the department

According to the curriculum of the practice in the specialty 6B07260 – "Technology and design of textile materials" conducted:

Educational and introductory practice (2 credit 36 hours);

Industrial practice (1) (4 credit 60 hours) ;

Pre-graduate practice (8 credit 120 sagat);

Bases of practice of the Department of Technology and Design of Textile materials: Azalertextile LLP , Azalacotton LLP, Shymkent POSH LLP, Shymkent Cashmere LLP, Nazar Textile LLP, Ak Altyn LLP, Bal Textile LLP, Alem-BT LLP, Bal Decor LLP, "NITS Zhanazhoba" LLP, "TulparRuzmetov" LLP, "BAER" Textile Factory, "Ontustikbylgary" LLP.

Before the start of the internship, students are assigned to places of practice. Students are previously acquainted with the distribution of places of practice. Organizational and methodological materials in the form of practice programs, guidelines for conducting practice, etc. are being prepared for the practice materials. Immediately before the practice, organizational meetings are held regarding the order of the internship. At the meeting, students are introduced to the content and procedure of practical training, their duties and rights. The requirements on the procedure for collecting and the content of documents that need to be collected during practice are set out. Considerable attention was paid to the requirements for the content, as well as the deadlines for submitting practice reports. As a result of the activities carried out, students prepare and defend practice reports in a timely manner. Reports are accepted by members of the commission consisting of teachers who led the practice. The organization and conduct of the practice takes place in accordance with regulatory documents. The results of the internship are reflected in the reports of the department on practice. According to the results of the production practice, meetings of the department and conferences are held. The content of the reports corresponds to the practice program. The shelf life of practice reports and storage conditions meet the requirements. During the practice, the current control over the course of the practice is carried out. In general, the organization of the practice is at the appropriate level. The department has guidelines for the organization and conduct of all types of professional practice, the university publication, all guidelines are made in the state and Russian languages. There are also diaries for monitoring the conduct of practices.
